Ocean Careers to Inspire: **A**nother **G**eneration of **E**xplorers

<http://oceanexplorer.noaa.gov/edu/oceanage/welcome.html>

Peter Etnoyer, Marine Biologist
Aquanautix Consulting

OceanAGE is an interactive online ocean careers offering that inspires students from all backgrounds to learn more about oceanography and to pursue the mathematics, science and technology coursework required to become more ocean literate.

Each year OceanAGE features ocean explorers participating in NOAA Ocean Exploration Expeditions. Diverse careers, including marine archaeologist, fish ecologist, marine taxonomist, natural products biologist, oceanographer, submersible pilot, and NOAA Corps Officer, are featured. Motivational information for students is provided through video profiles of scientists describing their research and work; their education, salary, and hours; rewards of their chosen fields and words of advice.

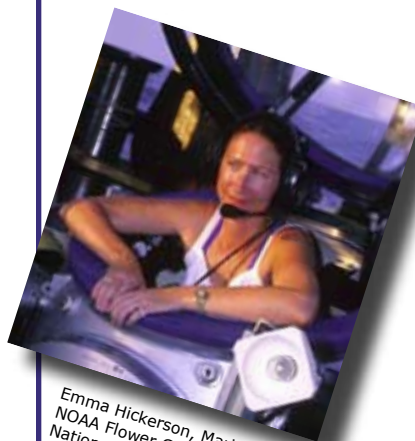

Dr. Roy Cullimore, Microbiologist
Droycon Bioconcepts Inc.
Regina, Saskatchewan, Canada

OceanAGE invites students to virtually interact through Web Chats and Web Forums with the talented people who explore our ocean planet. Our featured marine explorers provide students with first-hand knowledge about their exciting careers. Strictly supervised and moderated web events are scheduled throughout the year. These interactions are also archived on the site and offer a rich source of information about our ocean explorers.

Visit the OceanAGE Web site to learn more:
